PERSONAL PROJECTS

1. Calculator

Designed and developed a responsive calculator using HTML, CSS, and JavaScript. The calculator supports basic arithmetic operations such as addition, subtraction, multiplication, and division. Focused on clean UI design, smooth button interactions, and keyboard input support. This project demonstrates fundamental skills in DOM manipulation, event handling, and user-centric interface design.

2. E-commerce Website

Developed a full-stack e-commerce website with modern web technologies. The platform allows users to browse products, add items to a shopping cart, and proceed to checkout with secure payment integration. Features include user authentication, product management, responsive UI, and admin dashboard. Built using HTML, CSS, JavaScript, and backend technologies like Node.js, Express, and MongoDB.

4. Portfolio

I have designed and developed a website showcasing my personal information , projects,blogs and strong foundation in web development.
